Packaging without Limits

The Jokey standard programme.

The plastic packagings from Jokey are used millions of times each day to fill food and non-food products. Vendors from all sectors including the international leaders from trade and industry, trust in the sophisticated functionality, reliability and promotional effect of our packaging solutions. Jokey's broad standard programme is the result of almost 50 years of cooperation with our customers. With far-sighted innovations tailored to the market, we repeatedly set benchmarks for the packaging industry.

Your packaging partner worldwide.

Jokey combines the greatest expertise with personal service. We advise you in selecting a suitable packaging, in equipping it with user-orientated accessories and in the product branding designed to promote sales. Our technical service supports you in the set-up phase at the filling plant.

As one of the leading producers, we make sure you have consistently high quality in all your markets. With 14 production sites in 11 countries, we are able to guarantee just-in-time deliveries internationally.

Jokey Individual

Sensationally different.

Jokey.com/en/individual

The direct line to us!

Don't hesitate to get in touch with us.

For further information on the issue »Jokey Individual«, please visit our website jokey.com or approach our contacts directly. We look forward to hearing from you!

From eye-catcher to bestseller.

Unique packaging, created especially for your product, draws customers in and encourages them to make a purchase. It conveys the emotional world, the promise of quality, and the value of your brand. A strong packaging design attracts all attention in the aisle to your product and gives it the competitive edge.

Precisely the packaging of your choice.

Jokey decorates or produces your packaging precisely to your concept and exactly according to the corporate design of your brand. You benefit from the excellent expertise of our packaging professionals and from the state-of-the-art packaging techniques concerning design, functionality and convenience. When it comes to decoration techniques, at your disposal are the brilliant in-mould labelling, high-quality digital printing, and offset printing.

Unique Packaging Design.

Layout

Put your message in the limelight!

The interplay between the logo, colours, text and images creates your brand's distinctive corporate design. It gives your product a brand identity and highlights its position in the competitive field.

Container Colours

Make your brand unmistakable.

Colours arouse emotions and are one of the most important recognition features for your brand. We can produce your packaging in the colour of your choice – including clear. Buckets and handles can be coloured differently. In addition to the 11 standard colours at Jokey, we optionally offer various special colours as well as individual colours according to PANTONE, RAL or HKS. Glitter and metallic effects, as well luminous packaging materials can ensure the glamour of your product.

Image Motifs

Pure emotion.

Images appeal to the gut instinct and stimulate the buying impulse. The in-mould labelling practices at Jokey allow for emotive motifs that are captivatingly brilliant. The entire container surface and the lid can be entirely printed right to the edge. Optional multisensory effects lead to smelling, tasting, and marvelling.

Individual Types of Packaging

Custom moulding by specialists.

Nothing makes more of a difference than individually-shaped packaging. Would you like to have an eye-catcher that draws in all attention at the POS? Or do you want to tailor the function of your packaging specifically to your customers? The Jokey Moulding Service develops a special design in close collaboration with you, which corresponds exactly with your wishes. Jokey Werkzeugbau GmbH ensures precise moulds and Jokey Technical Service supports you in setting up filling production.

Future Technologies

Networked and convenient.

- > **Packaging 4.0**, which communicates with mobile terminals or scanner checkouts.
- > **Intelligent Packaging**, like thermochromic effects, for example, which show temperature changes with a change of colour.
- > **Smart Packaging** with an additional barrier function, like the Jokey Barrier Tainer as well as our comprehensive line of accessories.

Environmentally Friendly Packaging

The Jokey Eco Concept.

In order to minimise material usage, we manufacture our packaging with the thinnest walls possible. All Jokey packaging is made from homogeneous polyolefins and is up to 100% recyclable. We recommend the secondary raw materials resulting from our processes to create packaging for non-food items.

For more information on the Jokey Eco Concept, please refer to page 68.

Jokey Design Service

Package design by packaging professionals.

Packaging is the most important selling point for your product. Around 80 per cent of all purchasing decisions occur spontaneously at the POS. Attractive packaging therefore plays a crucial role: It draws consumers in and encourages them to pick up the product.

Full Service for Your Packaging Design.

We created Jokey Design Service in order to unleash the full sales potential of your packaging. As a full service provider of packaging design, we take care of everything for you; from consultation to creation to creating print templates.

The Jokey Design Service creates your packaging design for each of our standard or custom-mould packaging solutions. We design packaging for you which appeals to your target audience, advertises in the authentic and emotive manner that your product needs, and is therefore clearly recognisable as your product brand.

Creation

From consultation to design.

Initially we discuss what you expect from your packaging design and the volumes to be met. We then develop a design concept. As experienced packaging professionals, we know what is technically possible and how we can achieve the perfect advertising effect. We recommend you a colour scheme for your containers and we develop a print image with motifs, text, logos, etc.

Visualisation

Revolving 3D view of your packaging design.

We present your design concept to you as a rendering, a revolving, digital visualisation, as real prototype or as smallest product run for presentations and field tests. That way, you can assess it in realistic conditions and examine it from all angles. After coordinating with you and receiving your approval, we create the layout for your print image.

Printing

Processing with state-of-the-art technology.

The superb in-mould labelling procedures from Jokey guarantee emotive motifs in high-definition quality. Even multi-sensory effects and digital interactions can be integrated into the in-mould labels. For small runs, we make similar high-quality labels using digital printing. Even the classic offset print offers attractive design options.

PrePress

Technically perfect print templates.

Our printing specialists create print templates for the print motifs of your packaging. As a leading manufacturer, we pool together our experience of creating thousands and thousands of print motifs.

Accessories

Added value for you and your customers.

Our comprehensive line of accessories provides the consumers with practical assistance, protects your product and facilitates your marketing. We will be pleased to help you select an appropriate accessory solution.

- Drain tap for removing liquids
- Spout
- Drop handles for large and heavy containers
- Quick Pack Lid, the hinged lid for large buckets
- Wet wipe dispenser
- Plastic roller grips for metal handles
- Hold-down device for products delivered in brine or oil
- Product pump for insertion into pre-punched opening in the lid
- Pump stopper
- Pump embossing
- Shaker lid for mixing paints and plasters
- Rolling top: paint roller screens and paint roller plates are available for some oval and rectangular containers
- Recessed lid to store a stirrer bar
- Special UN-approved containers for hazardous materials
- Degassing valve (for example for sauerkraut)
- Film lid for hermetic sealing
- Two-component inset
- Promotion cover
- Ice cream spoons

Jokey-Solution-Packaging (JSP)

- > Special solutions in design, shape and material
- > For food and non-food filling materials
- > Attractive, outstanding container shapes
- > Freely available packaging solutions

JSP Jokey-Solution-Packaging NEW

The easy road to an outstanding shape.

If you require a non-standard packaging shape, it will not always be necessary to commission the development of an own custom mould. There is a more economical solution: Jokey-Solution-Packaging (JSP).

The packaging range includes attractive container shapes and particular packaging functions developed by Jokey on behalf of a customer. The customer, however, does not claim exclusivity, the moulds may be used for alternative applications. There may partly be restrictions in terms of branch of trade, product line or field of application.

Feel free to contact us! We will clarify if the JSP of your choice is approved for your intended use.

Bucket round

Simple shape. High-tech functionality.

Jokey offers you an outstandingly broad range of round buckets. Like all Jokey packagings, they comply with the most stringent requirements for automatic filling of hot or cold products. They optimise your production and logistics processes, protect your product and increase its shelf life. They win over the consumer through their great convenience.

At a glance:

- > Numerous volumes in various weight categories for all filling materials
- > Numerous accessory options
- > One lid diameter for various container volumes
- > Producible in all colours and using all decoration processes
- > Sealing and closure options
- > Handle made of plastic or metal
- > Optional barrier to keep out oxygen and steam

JST Jokey-Seal-Tainer

The champion in its weight class.

The lighter they come, the more sustainable they are: The JST reduces the amount of material used, produces lower CO2 emissions when transported and decreases disposal fees. At the same time the JST is more stable and robust than other ultra-light buckets. Its slender handle enables standard filling weights to be transported reliably, ergonomically and conveniently.

Kitchen professional with freshness seal.

The new Jokey Seal Tainer is tailored precisely to the needs of your bulk consumers: The ultra-light container has a widened edge to which a peel-off sealing film can be attached. The film protects your product and ensures trust on the part of the consumer.

Bucket oval

The paint professional.

Every day, the oval Jokey Euro Tainer proves its value millions of times over as packaging for paints, adhesives and other products from the construction chemicals industry. Jokey offers you the largest oval series available on the market, with volumes from 1.3 to 19 l. Numerous optional accessories enhance the convenience for craftsmen and do-it-yourselfers.

At a glance:

- > Service-proven bucket for the construction chemicals industry
- > Large selection of volumes
- > Broad advertising space, all decoration processes
- > Numerous accessory options
- > Handle made of plastic or metal
- > Suitable for shakers

Draw attention to your product!

Ensure you gain a valuable competitive edge through an attractive packaging design. Our decoration processes offer your product branding all the technical options, from simple and functional to high-resolution and brilliant. No limits are set on your creativity. We implement even the most demanding designs in excellent quality – for all batch sizes. We ensure that your product family is highly recognisable at the POS.

JETO+ Jokey-Euro-Tainer-Oval-Plus

- > Bucket suitable for shakers, for paints and construction chemicals
- > The lid fits tightly and reliably
- > 100% liquid-tight
- > New JETO+ closure system
- > Easy-opening closure system
- > New lid ribbing ensures a high-level of stability

Professionals for paints and construction.

The new oval JETO+ and its round counterpart JET+ are perfect for the requirements of the construction chemicals industry. They pack heavy goods such as paints, coatings or plasters securely. The robust, compact design can cope with heavy mechanical loads.

100 % leak-proof in the shaker.

Thanks to their innovative lid edge system, the JET+ and JETO+ also remain reliably leak-proof in the shaker. The guarantee for the shaker is for 3 x 3 minutes. The user will be delighted by a perfect colour mix: The underside of the lid is segment-free, which ensures that no paint residue is left there when shaken.

- > Suitable for shakers
- > Plenty of room for your advertising
- > All decoration options
- > Easy handling
- > Suitable for mixing plants

A completely new packaging shape.

The Jokey-Multi-Pack surprises with a successful mixture of oval and rectangular design. Its rounded edges correspond to the contemporary tastes. The innovative design signalises style and trendiness in a unique manner.

The best brand ambassador.

Not only the outstanding shape, but also the broad facing of the Jokey-Multi-Pack give your product a visual lead. Front and back provide plenty of room for your product advertising. With first-class decoration processes, Jokey can offer large-scale decorations. Brand recognition is ensured: we produce containers, lids and handles in the exact colour of your brand. The new shape combined with an emotive branding guarantees the turn of your product into an eye-catcher.

The new Jokey-Multi-Pack is the ideal packaging for a product launch!

Tubs and trays

Small, fine and in high demand.

Whether Mediterranean delicacies or products from the construction chemicals industry – small volumes are perfectly packaged in the tubs and trays from Jokey. The easy-opening closure system and the reclosability ensure convenience. The barrier and seal ensure longer product shelf life. Decorated with the brilliant In-Mould Labelling, your product is sure to stand out at the POS.

At a glance:

- > Robust, stable and re-closable
- > Added value as reusable bucket
- > Handle with roller grip

CLOSURE SYSTEM

- > Reusable closure system

COLOURING

- > Available in all colours and transparent

FOOD-SAFE

SPACE-SAVING

- > Stackable

DECORATION

- > Offset print
- > Digital print

MATERIAL

- > PP
- > Secondary raw materials
- > Biopolymers (on request)

HANDLE

- > Metal handle with roller grip

WEIGHT CATEGORIES

- > Medium

REUSAGE

- > Optimally recyclable
- > Can be emptied without leaving any residue

JG Jokey-Gallon

- > For heavy chemicals and construction chemicals
- > Robust and reliable in almost all situations
- > Handle made of colourable plastic

CLOSURE SYSTEM

- > Reusable closure system
- > Tamper-evident closure
- > Foam rubber seal optional

COLOURING

- > Available in all colours and transparent

MATERIAL

- > PP
- > Secondary raw materials
- > Biopolymers (on request)

SPACE-SAVING

- > Stackable

DECORATION

- > Digital print
- > Offset print

REUSAGE

- > Optimally recyclable
- > Can be emptied without leaving any residue

HANDLE

- > Ergonomic plastic handle

WEIGHT CATEGORIES

- > Heavy

ACCESSORIES

- > Spout
- > Wet wipe dispenser
- > Degassing valve

FOOD-SAFE

The options are not available for all models. Secondary raw materials are only suitable for non-food products. Please take note of our detailed article specifications and technical guidelines.

Jokey Eco Concept

Sustainable packaging design
for plastic packaging.

Sustainability@jokey.com

The direct line to us!

Don't hesitate to get in touch with us.

For further information on the issue »Jokey Eco Concept«, please visit our website jokey.com or approach our contacts directly. We look forward to hearing from you!

Verifiably sustainable.

When developing our packaging, we pay great attention to ensuring maximum sustainability throughout the entire product life-cycle. Thanks to our experience and our excellent technical equipment, we are able to create ecological, functionally trend-setting packaging designs. Jokey stands for packaging solutions which enable us and our customers to combine business success with a responsible attitude towards people and the planet.

An Issue of Recycling.

The Jokey Eco Concept proves: sustainable plastic packaging is possible. On one condition: After use, emptied packaging is to be returned to the material cycle and not to be thrown away randomly. It is a valuable raw material. In industry associations and bodies, the Jokey Group is committed to the goal of developing plastic packaging more efficiently and more environmentally friendly and of promoting the establishment of functioning recycling systems worldwide.

360° Responsibility. Sustainability at the Jokey Group.

As a family company, we think long-term and with conscientiousness. Sustainability is firmly established in our company values. It involves all areas of our company policy – from the development of resource-saving packaging systems, to energy-efficient production and construction techniques, to our social engagement and our role as a reliable and future-oriented business partner and employer.

ThinWall Technology

Increasingly thin. Increasingly efficient.

One of our main goals is to save materials. Thin wall packaging uses fewer raw materials and reduces our ecological footprint in logistics and transport. Since the early 1990s we have been able to reduce the operating weight by more than a third. At the same time, we have been able to satisfy our customers' increasing demands for functionality. Jokey packaging is not only becoming increasingly thin, it's also increasingly stable, break-proof, user-friendly, and attractive.

100% Recyclable

Packaging becomes packaging again.

We place great importance on the fact that the plastics and the decorations we use are 100% recyclable. Jokey packaging is produced from homogeneous polyolefins, primarily polypropylene or polyethylene. Polyolefins are particularly suitable for recycling. Jokey packaging can be used completely in the material cycle and can be reused as recyclables without losing relevant technical quality.

Completely Drainable

Ideal for the liquidation process.

All Jokey packaging includes a removable lid. Your customer can use the product to the very last drop. This not only helps you, the manufacturer, to meet the requirements for consumer protection, but it also facilitates the processes in the recycling chain, since left-over material in packaging generates high technical expenses and increases the cost of the recycling process.

Secondary Raw Materials

Recycling packaging for non-food products.

Paint, building materials, chemicals, and other non-food products can be packaged just as well and securely in our recycled packaging as in new plastic. The grey recyclate buckets can be appealingly enhanced using digital printing and all options of In-Mould-Labeling processes. As well as recyclables, we also use reprocessed production waste or 'recyclates' from our own production.

Physiologically Safe

Tested additives and ingredients.

In the production of our packaging we exclusively use additives which meet the requirements of Commission Regulation (EU) No. 10/2011 as well as the legal provisions of Regulation (EC) No. 1935/2004. The materials are tested in an accredited laboratory regarding their conformity as well as food safety. All materials are only used in production after a positive test report.

Biopolymers

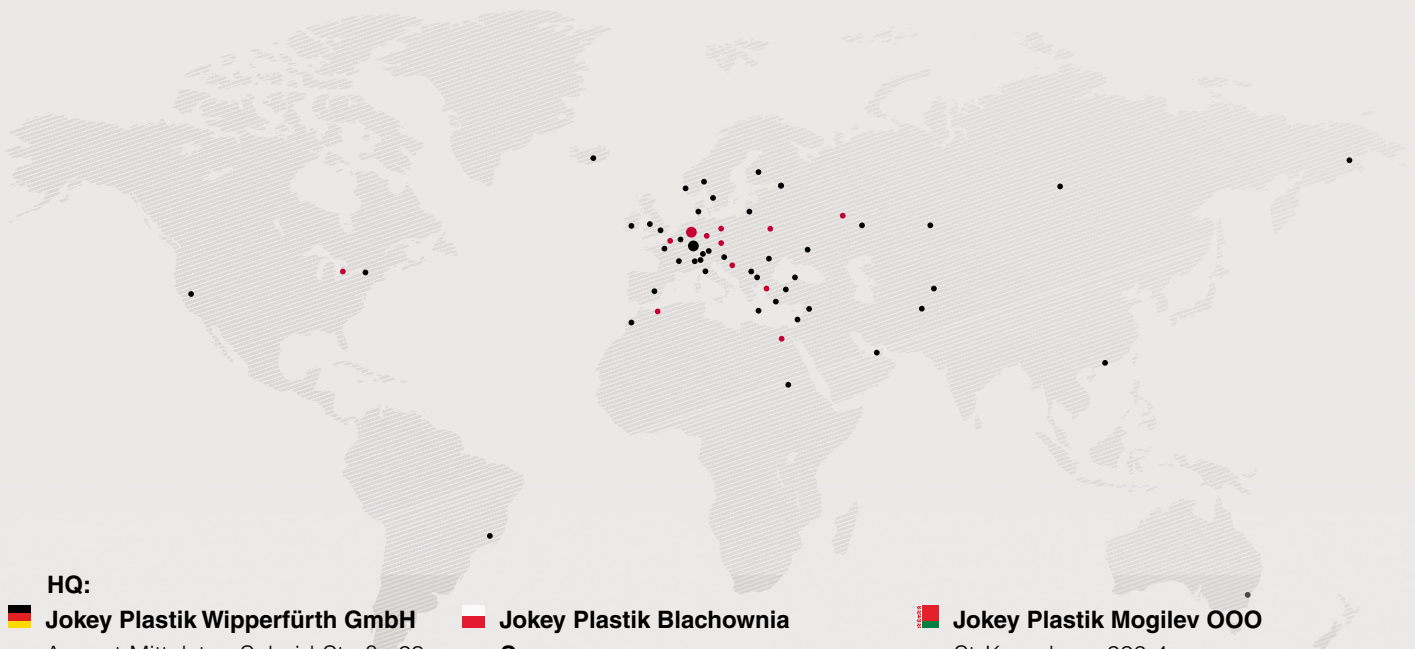

Packaging from sustainable biomass.

Jokey will use only biopolymers from sustainably produced biomass and with internationally recognised certification. We are happy to check whether a biopolymer can withstand the demands of your products and processes. Please call us for further information.

Reusage

More than just packaging.

Jokey packaging is robust, completely drainable, and reliably resealable. If the product is used up, the packaging can be made further use of in various fields of application. Reusage offers your customers attractive added value. And it reminds them of your brand each time they reuse it – the most important factor for repeat purchases.
